

A Beamer presentation using Pandoc

Keeping it simple

Luis Ammour ¹ Another Author ²

¹Univ. Paris-Sud

²International Institutes of L^AT_EX

Writing a slides presentation with as least effort as reasonably achievable

Markdown

For the structure

Markdown titles (*i.e.* #, ## and ###) are used for structuring the document.

are used for chapters titles, creating a slide with the title only.

titles are the way to create a new slide

are subtitles inside a slide, or blocks, depending of your theme.

--- is a pagebreak, it creates a new slide without header.

For tables

Table 1: Here's the caption. It, too, may span multiple lines.

Centered Header	Default Aligned	Right Aligned	Left Aligned
First	row	12.0	Example of a row that spans multiple lines.
Second	row	5.0	

Markdown 2

For the text formatting

You can use pandoc markdown in order to format the content :

- ▶ -: lists
 - ▶ and nested lists
- ▶ **emphasis**: *emphasis*
- ▶ ****double emphasis****: **double emphasis**
- ▶ `'monospace font'`: monospace font

Citations

Like this one

And code blocks

```
def fun(a: int) -> None:
    if a >= 12:
        print("a is {}".format(a))
    else:
        print("a is less than 12")
    return
```

L^AT_EX commands are allowed

For maths

$You_{can} \sum_{some}^{add} \frac{Mathematical}{equations} \rightarrow !$

Blocks !

Example block

Example text

etc.

Images

You can put images

Markdown

```
![A sample image](lena.png){width=30%}
```

Result

Figure 1: A sample image
