logo

Writing a slides presentation with as least effort as reasonably achievable

logo

Markdown

For the structure
Markdown titles (*i.e.* #, ## and ###) are used for structuring the document.
are used for chapters titles, creating a slide with the title only.
titles are the way to create a new slide
are subtitles inside a slide, or blocks, depending of your theme.
--- is a pagebreak, it creates a new slide without header.

For tables

Table 1: Here's the caption. It, too, may span multiple lines.

Centered Header	Default Aligned	Right Aligned	Left Aligned
First	row	12.0	Example of a row that spans multiple lines.
Second	row	5.0	Here's another one.

logo

Markdown 2

For the text formatting

You can use pandoc markdown in order to format the content :

- ▶ -: lists
  - ▶ and nested lists
- ▶ *emphasis*: *emphasis*
- ▶ **double emphasis**: **double emphasis**
- ▶ `monospace font`: monospace font

Citations

> *Like this one*

And code blocks

```python
def fun(a: int) -> None:
  if a >= 12:
    print("a is {}".format(a))
  else:
    print("a is less than 12")
  return
```

logo

LaTeX commands are allowed

For maths
$You_{can} \sum_{some}^{add} \frac{Mathematical}{equations} \rightarrow$!

Blocks !

Example block
Example text

etc.

logo

Images

You can put images

Markdown
`![A sample image](lena.png)`{width=30%}

Result

Figure 1: A sample image
