Writing a slides presentation with as least effort as reasonably achievable

logo

Markdown

For the structure

Markdown titles (*i.e.* #, ## and ###) are used for structuring the document.
are used for chapters titles, creating a slide with the title only.
titles are the way to create a new slide
are subtitles inside a slide, or blocks, depending of your theme.
--- is a pagebreak, it creates a new slide without header.

For tables

Table 1: Here's the caption. It, too, may span multiple lines.

Centered Header	Default Aligned	Right Aligned	Left Aligned
First	row	12.0	Example of a row that spans multiple lines.
Second	row	5.0	Here's another one.

logo

This is a note!

Markdown 2

For the text formatting

You can use pandoc markdown in order to format the content :

- `-`: lists
  - and nested lists
- `*emphasis*`: *emphasis*
- `**double emphasis**`: **double emphasis**
- `‘monospace font‘`: monospace font

Citations

> Like this one

And code blocks

```python
def fun(a: int) -> None:
  if a >= 12:
    print("a is {}".format(a))
  else:
    print("a is less than 12")
  return
```

Latex

LATEX commands are allowed

For maths

$$You_{can} \sum_{some}^{add} \frac{Mathematical}{equations} \rightarrow !$$

Blocks !

Example block

Example text

### etc.

Images

You can put images

Markdown
![A sample image](lena.png){width=30%}

Result
